PARSA BANITABA

Flutter Developer | Software Engineer

banitabaparsa@gmail.com +98 912 073 4729 Tehran, Iran parsabanitaba.ir
parsabanitaba Sureiamdiamond

PROFILE

- Flutter developer with three years of experience building mobile apps, specializing in banking apps.
- Member of the mobile app team at IPAAM, building **Tobank**, the virtual branch of Gardeshgari (Tourism) Bank, including its Server-Driven UI version.
- Proficient in Flutter, Dart, BLoC, GetX and Clean Architecture; turns Figma designs into responsive, localized UI.
- M.Sc. student in Software Engineering.
- Strong problem solving, clear communication with design and development teams, and a habit of continuous learning.

EDUCATION

M.Sc. in Computer Engineering (Software)

Islamic Azad University, Central Tehran Branch

Oct 2025 – Present Tehran

B.Sc. in Computer Engineering (Software)

Islamic Azad University, Tehran West Branch

Oct 2021 – Oct 2025 Tehran

CERTIFICATIONS

FCE, CAE, TTC

Zaban Gostar Gharb Institute

Apr 2020

Python (Beginner to Intermediate)

Tehran Technical Complex, Bamland Branch

Sep 2023

Clean Architecture with Bloc/GetX

Faradars Platform

Apr 2025

EXPERIENCE

Flutter Developer

IPAAM (Ideh Pardaz Danesh Novin Arsham), Mobile App Team

Apr 2024 – Present Tehran

- Develop and maintain the **Tobank** mobile banking app, the virtual branch of Gardeshgari Bank, with Flutter and Dart.

PROJECTS

Tobank App

Virtual Branch of Gardeshgari Bank

Apr 2024

Link: tobank.ir

- Mobile banking app built by IPAAM's mobile app team.
- Flutter, Dart, BLoC, GetX, Dio, Firebase.

Tobank SDUI

Server-Driven UI for Tobank

Apr 2026

- Tobank screens rendered from JSON received from the server, built with the Stac framework.
- Pages can change without releasing a new app version.

Classyar

Islamic Azad University

Oct 2025

Cafebazaar: cafebazaar.ir/app/com.classyar.app

Myket: myket.ir/app/com.classyar.app

- Teachers manage students and record daily attendance with four statuses: present, absent, late, excused.
- Notes for each student; attendance for any day.
- Persian calendar and right-to-left UI.
- Flutter and Dart, data through an API and Firebase.

Weather App

University Project

Apr 2025

GitHub: github.com/Sureiamdiamond/weather_app

- City search, current conditions and multi-day forecast with hourly and daily details (WeatherAPI).
- UV index, sunrise and sunset, humidity, pressure and wind widgets; offline cache of the last forecast.
- Compass page, Gregorian–Jalali date converter and a Gemini page.

- Build **Tobank SDUI**: app screens are rendered from JSON sent by the server, using the Stac framework.
- State management with **BLoC** and **GetX**; Freezed for data models, events and states.
- Software architecture with Clean Architecture, MVVM and MVP.
- API integration with Dio and HTTP.
- Dynamic themes and full UI customization; Figma designs turned into responsive UI.
- App localization (multi-language support).
- Agile teamwork with Jira and Git (GitHub, GitLab).

Flutter Developer

Islamic Azad University, Tehran West Branch

Jul 2025 – Dec 2025 Tehran

- Built **Classyar**, a class attendance app for teachers, published on Cafebazaar and Myket.
- Developed UI pages in Flutter for dynamic features.
- State management with GetX and BLoC.
- Connected the app to an API and Firebase for data management.
- Improved app performance and reduced loading time by up to 30%.
- Worked with the design team on a friendly, easy-to-use UI; tested and debugged the app.

Flutter Developer Intern

IPAAM (Ideh Pardaz Danesh Novin Arsham)

Nov 2023 – Apr 2024 Tehran

- Learned Flutter and Dart fundamentals and applied them in real projects.
- Helped develop and maintain production Flutter apps.
- Worked with senior developers on scalable, user-friendly apps.
- Wrote clean, documented code; took part in code reviews and bug fixing.
- Testing, debugging and performance improvements.

Programming Intern

Codeyad

May 2023 – Aug 2023 Tehran

- Built the TechBlog project.
- Helped develop and maintain an app under the supervision of senior developers.
- Contributed to designing and implementing new features in real projects.
- Attended code review sessions and fixed reported bugs; performance testing and troubleshooting.
- Clean Architecture (data, domain, presentation) with BLoC, get_it and injectable.

TechBlog App

Group Project under Prof. Safari

Jul 2022

GitHub: github.com/sasansafari/techblog

- Podcast and tech-news app built with Flutter.

RESEARCH

Literature reviews

- Linux Kernel Security and Isolation
- Social Opinion Prediction with LLM Agents
- Distributed Petri Nets for ROS Robotics
- IoT Security with Blockchain

SKILLS

Dart, Flutter, BLoC, GetX, Freezed, Stac (SDUI), Clean Architecture, MVP, MVVM, Dio, HTTP, REST APIs, Firebase, Git, GitHub, GitLab, Jira, Agile, Figma to Flutter, Responsive UI, Theming, Localization, Debugging, Python
